

District Philosophy

The Califon Public School strives to instill confidence in students by providing a solid foundation in fundamental mathematical skills preparing students to use analytical concepts and mathematical reasoning necessary to perform real world problem solving. We are committed to challenging students and maintaining high academic standards.

- The mathematics curriculum serves to encourage all students to appreciate mathematics throughout their school years.
- The curriculum is based on the belief that all students can learn and will benefit from meaningful mathematics.
- The curriculum bridges the transition from arithmetic to algebra, in such a way, that algebra is accessible to all students.
- The curriculum accommodates developmental differences among students.
- The curriculum optimizes stimulating new material and provides embedded review throughout the program.
- The curriculum recognizes that some content becomes more important because technology requires it and some content becomes possible because technology allows access to it.
- The curriculum incorporates applications and real world mathematics throughout the program.
